Dear Dr. Schlottfeldt:

May I comment on your letter of March 23 to Dr. Watson about the study plans for Eng. Maestri, who wishes to qualify for a Rockefeller Foundation fellowship to enable him to take graduate work in plant physiology at the University of California.

We note that you are in correspondence with Dr. Currier, Dean of the Graduate Division, and simply wish to point out that it is entirely appropriate for you and Eng. Maestri to continue your correspondence with him and to enter into correspondence with Eng. Maestri's probable major professor. We would appreciate your sending us copies of your correspondence with these people so that we may be fully informed on the final arrangements you make for Eng. Maestri's proposed studies.

Before we can submit Eng. Maestri's application to our fellowship committee, we will need to have definite word from you or from him as to who his adviser at Davis will be.

Very sincerely yours,

John J. McKelvey, Jr.
